CS STUDENT • FULL STACK DEVELOPER

CS student currently in his junior year of a Bachelor's degree in Computer Science Engineering. Proficient in developing scalable full-stack web and mobile applications. Assisted over 2 startups in their initial phases by building and scaling their technical infrastructure and product development making their existing infra much faster and reliable.

EXPERIENCE

dipEAT Foods Pvt Limited   **Dec 2023 - June 2024**
Full Stack Developer (intern)

- Revamped the existing django backend to an much more efficient nodejs backend using the nestjs framework increasing performance and security by more than 50%.
- Created feature where restraunts can collaborate with each other to give customers a shared menu.
- Developed the iOS and android app with the newly built nodejs backend.
- Established various features like push notifications, websockets, distance calculations, etc with the help of various tech like socket-io, FCM, distance matrix APIs, etc.

    Skills: React Native, Andriod, Firebase, Cloud Messaging, WebSockets, etc.

GupShupp   **Dec 2023 - Jan 2024**
Full Stack Developer (intern)

- Worked on an app with where users can chat with random persons over the internet to make new freinds.
- Using React Native, WebSockets, and a powerful backend (Node.js, MongoDB), under the guidance helped the team in crafting a seamless user experience, managing UI/UX, establishing real-time communication
- Integrating key features like hate speech filter with help of ML models.

    Skills: React Native, Nodejs, MonogDB, Socket.io, ML, transfomerjs, Nextjs, Android

PROJECTS

rubiks   **Jun 2024 - Present**
live

Personalised cloud storage solution that emphasises freedom, security, and simplicity. All built on the latest open-source and bleeding edge technologies . On top of a microservice based architecture with various services connected via an asynchronous rabbitmq message broker. Files gets stored in an encrypted manner ensuring safety and gets streamed after optimizations via sharp, ffmpeg, etc. Also have a react native based iOS and Android client and a web dashboard built with nextjs for handling all the user data.
Tech Stack: Microservices, Nodejs, S3, RabbitMQ, Redux Toolkit, RTK Query, Nextjs, Shadcn-ui, React Native, Postgres, Redis, k8s, docker, ffmpeg, Typescript, Go, etc.

devstats   **Aug 2024 - Present**
link

Summarised dashboard listing your recent GitHub activity, Pull Requests, Issues, coding stats, etc making it much more convenient to have a glance on all at a single place. The notes taker, task scheduler integrated into it also makes managing tasks even more easier. On top of all these a chat bot running with the help of ollama.
Tech Stack: Nextjs, React, Nestjs, Nodejs, Graphql, Redux Toolkit, RTK Query, Shadcn-ui, Typescript, Ollama, LLMs, etc.

EDUCATION

Bachelor of Technology (CSE)   2022-2026
Lovely Professional University

Senior Secondary   2020-2022
Frontier Senior Secondary School

LANGUAGES

English
Professional working proficiency

Hindi
Native or bilingual proficiency
